To whom it may concern

11 October 2011

Confirmation: European Directive: 2000/53/EC (ELV) and its amendments

We confirm:

The thermoplastics resins of product lines **Lustran@ABS**, **Novodur@** and **Triax@** comply with the requirements of the European Directive 2000/53/EC (End-of-Life Vehicles Regulation), its amendments including 2010/115/EC and Council Decision 2005/673/EC, changing Annex II of Directive 2000/53/EC.

Article 4 lays out the limits on heavy metals and Annex II provides the exemptions. The initial directive said no lead, cadmium, mercury and hexavalent chromium should be present. The most recent amendment to the directive -2010/115/EC states that a maximum concentration value up to 0,1 % by weight and in homogeneous material, for lead, hexavalent chromium and mercury and up to 0,01 % by weight in homogeneous material for cadmium shall be tolerated.

Compounds of cadmium, lead, mercury and hexavalent chromium have not intentionally been added to the manufacturing process of the **Lustran@ABS**, **Novodur@** and **Triax@** products. Therefore, **Lustran@ABS**, **Novodur@** and **Triax@** products do not contain any of these heavy metals with the exception of technically unavoidable traces.

Dr. Wolfgang Schulz-Schlitte
Product Safety Manager

This information of and our technical advice-whether writing or by way of trials-are given in good faith but without warranty and this also applies where proprietary rights of third parties are involved. Our advise does not release you from the obligation to check its validity and to test our products as to their suitability for the intended processes and uses. The application use and processing of our products and the products manufactured by you on the basis of our technical advice and beyond our control and, therefore, entirely your own responsibility. Our products are sold in accordance with the current version of our General Conditions of Sale and Delivery.
